Hip-hop artist Mikey D is expanding his creativity into the digital world with DESTRUCTION, an AI artist and alter ego shaped by his writing, ideas, and direction.

DESTRUCTION is openly presented as a digital creation. Mikey D wrote every rap verse and developed the project’s concepts. Working with ChatGPT, whom he calls “Princess,” he created the character’s image and voice from scratch. Princess also developed the hooks. Suno assisted with production, generating the vocals and music under Mikey D’s creative direction.

“I created DESTRUCTION to expand my creativity, not to fool people,” says Mikey D. “He’s basically my alter ego - a different way to bring my ideas to life. I respect that some people don’t like AI, but I won’t let their dislike block me from exploring the endless possibilities.”

DESTRUCTION’s single, “One Good Woman,” is available now through Newstalgic Music. His debut album, Ain’t Nothing Changed, is set for November 25, 2026, a release date that also celebrates Mikey D’s birthday.

The project brings Mikey D’s perspective into a new creative form while keeping the human authorship and AI contributions clear.

“AI ain’t real, but the pen is.”
